Lecture 43

1. Define the following
   i)   Balanced Star Load
   ii)   Balanced Delta Load

2. In a balanced delta connected three phase load, phase current is 10A and lags behind phase voltage 200V by 60°. Determine
   i)   Three Phase Active Power
   ii)   Three Phase Reactive Power
   iii)   Three Phase Apparent Power
