CIE Level 1

Getting Started with Entrepreneurship

Course Overview

Sathya Prasad
CIE

CIE Level 1 - Getting Started with Entrepreneurship

Course Objective

- Mindset for innovation & entrepreneurship (I&E)
- Business aspects of startup
- Tech I&E landscape
- Role of the entrepreneur in the startup process
- Creating value through I&E

CIE Level 1 - Getting Started with Entrepreneurship

Learning Outcome

1. Attitudes/characteristics associated with an *entrepreneurial mindset*
2. How entrepreneurs perceive *opportunity, manage risk, organize resources*
3. *Planning and modelling a business* for a given idea/opportunity
4. *Collaborative learning* through peer interaction
5. '*Soft skills*' – communication, teamwork, networking and more!

CIE Level 1 - Getting Started with Entrepreneurship

Sample Lesson Plan

CIE Level 1 - Getting Started with Entrepreneurship

What's different about this course?

**Pre-Session
Activities
(1-1.5hrs)**

Session

**Post-Session
Activities
(~1.5hrs)**

CIE course requires & encourages:

Active learning & doing

You to be Creative ("right-side" of the brain)

Experiential learning (activities, discussion, your point-of-view)

Teamwork (in/outside the session)

You to discover who you are and your passion

CIE Level 1

Getting Started with Entrepreneurship

Course Mechanics

Sathya Prasad

CIE

CIE Level 1 - Getting Started with Entrepreneurship

Course Mechanics

- This is **2-credit** Special-Topic course
- You will operate as a (startup) **team** – creating/maintaining the team is very important
- **Evaluation:** 2 ISA (CBT), *Assignments + In-Class-Assessment (ICA)* & *Final Project* (in lieu of ESA)
- **Final Project:** 1 Group/Team project across (no individual/solo projects, 3 intermediate checkpoints)
- **Class notes:** will be shared electronically; *highly encourage you to take notes as well*
- **Course grade:** you need all 4: ISA, Assignment, ICA & Final Project (no make-up ISA/Final Project)
- If you can't attend a session, inform CIE Program Manager in advance

Assessment:

ISA: 20%, Assignments: 20%, Mini Project: 20%, Final Project: 40%

Grading:

S: 90 – 100 A: 80 – 89 B: 70.- 79 C: 60 – 69 D: 50 – 59 E: 40 – 49 F: 39 & below

* ICA: In-Class-Assessment comprises of activities, readings, videos, etc

CIE Level 1 - Getting Started with Entrepreneurship

Getting the Best out of the Course

- **Discipline and Commitment - key ingredients of a successful entrepreneur!**
- **Practice the framework/tools you learn**
 - develop skills to use the 'tools' ; not formulaic, find out what works best for you
- **Lots of 'doing'**
 - be prepared for a number of activities!
 - be prepared to work in a team

Be Curious / Question / Explore as a Team

Start your journey into the world of *Innovation & Entrepreneurship!*

CIE Level 1

Getting Started with Entrepreneurship

Introduction to Entrepreneurship

Sathya Prasad
CIE

CIE Level 1 - Getting Started with Entrepreneurship

What is Entrepreneurship?

*The capacity and willingness to **develop**, organize and manage a **business** venture along with any of its **risks** in order to make a **profit**.*

*“Entrepreneurs do much more than imaginable with much less than seems possible”**

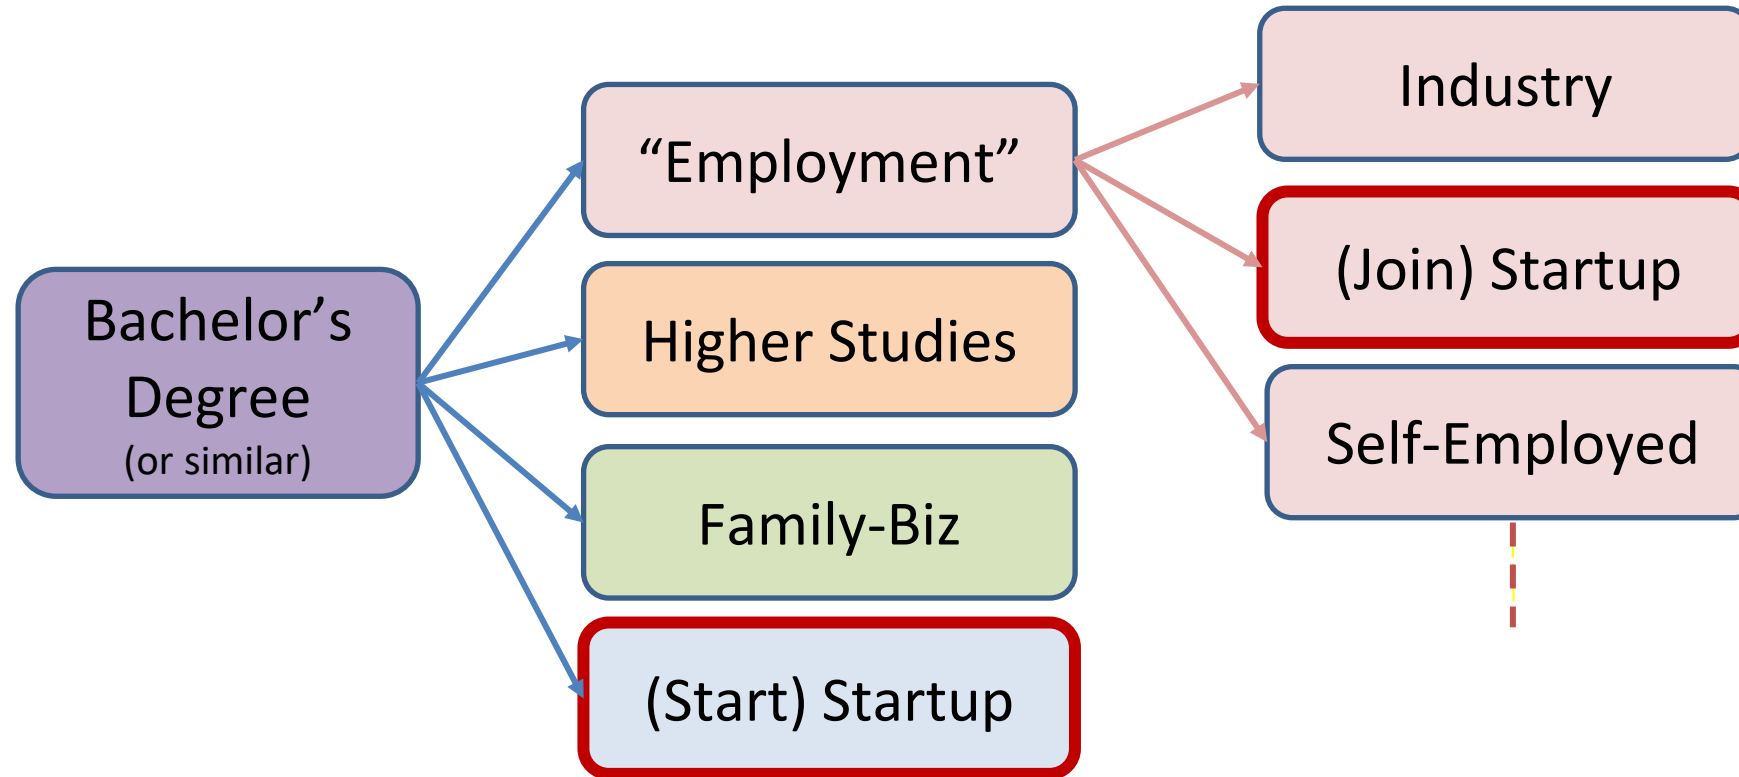

*“Entrepreneurship is when you act upon opportunities and ideas and transform them into value for others. Value created can be financial, cultural, or social”***

* Source: Stanford University

** Source: EU Entrepreneur Competence Framework

CIE Level 1 - Getting Started with Entrepreneurship

Entrepreneurial vs. Entrepreneurship

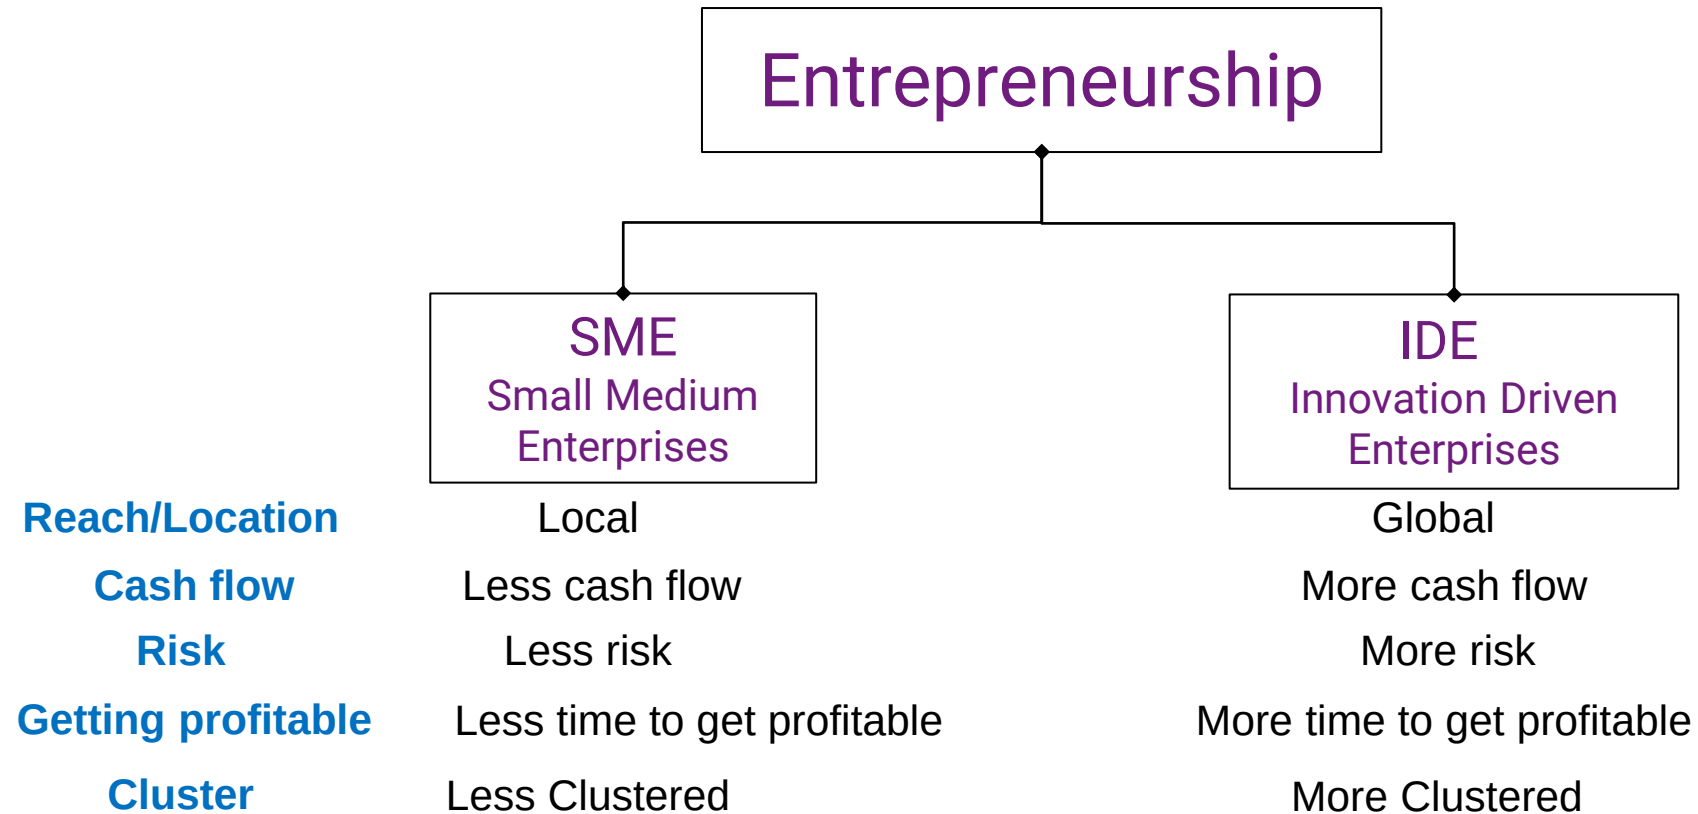

Everyone can be *Entrepreneurial*

You must choose to be an *Entrepreneur*

CIE Level 1 - Getting Started with Entrepreneurship

Types of Entrepreneurship (Innovation Dimension)

CIE Level 1 - Getting Started with Entrepreneurship

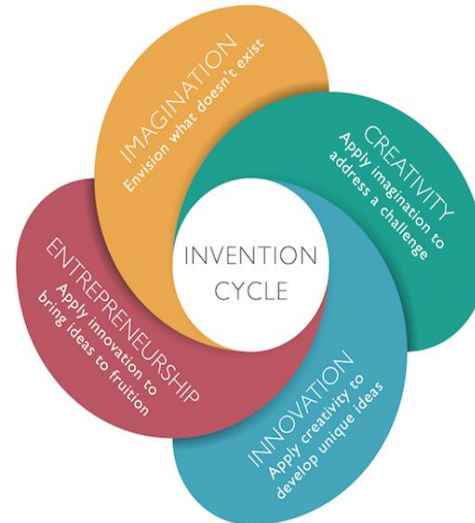

Paving the Way to Entrepreneurship

Imagination:

envisioning things that do not exist

Entrepreneurship:

applying innovation,
creating value,
thereby inspiring others'
imagination

Innovation:

applying creativity to *generate novel solution(s)*

Creativity:

applying imagination to
address a challenge

Entrepreneurial Myths & Entrepreneurial Traits

Sathya Prasad
CIE

CIE Level 1 - Getting Started with Entrepreneurship

Some Myths of Entrepreneurship

- Smartest + High Achieving
- Individualists
- Born not made
- High risk takers
- Charismatic
- Not disciplined

CIE Level 1 - Getting Started with Entrepreneurship

Common Entrepreneurial Traits

CIE Level 1 - Getting Started with Entrepreneurship

Common Entrepreneurial Traits

Ideas and Drive

- Creativity
- Vision
- Ability to identify opportunities
- Passion

People Skills

- Leadership
- Influence
- Network Building
- Ability to excite people by vision

Work Style

- Self-challenging
- Goal oriented
- Comfortable with uncertainty
- Rarely satisfied

→ **Entrepreneurial background** (family biz, worked at a startup, know friends doing startups)

→ **Finance knowledge/exposure** (financial savviness)

Startup Definition & Overview

Sathya Prasad
CIE

CIE Level 1 - Getting Started with Entrepreneurship

Startup Working Definition

*“A startup is a **temporary** organization designed to search for a **repeatable** and **scalable** business model”*

What we know about Startups by Kauffman Founders School” [Link](#) (1:50)

CIE Level 1 - Getting Started with Entrepreneurship

Startup Definition – India Perspective

“An entity working towards innovation, development, and commercialization of new products, processes, or services driven by technology or intellectual property”

01

Age: 5 YEARS

Active technology product / platform companies inception in the last 5 years (in 2014 or later)

02

Origin: INDIA

Founders of Indian origin, with HQ or core product development in India

03

Differentiator: Innovation

Innovation in technology, business process or business model being executed at speed

04

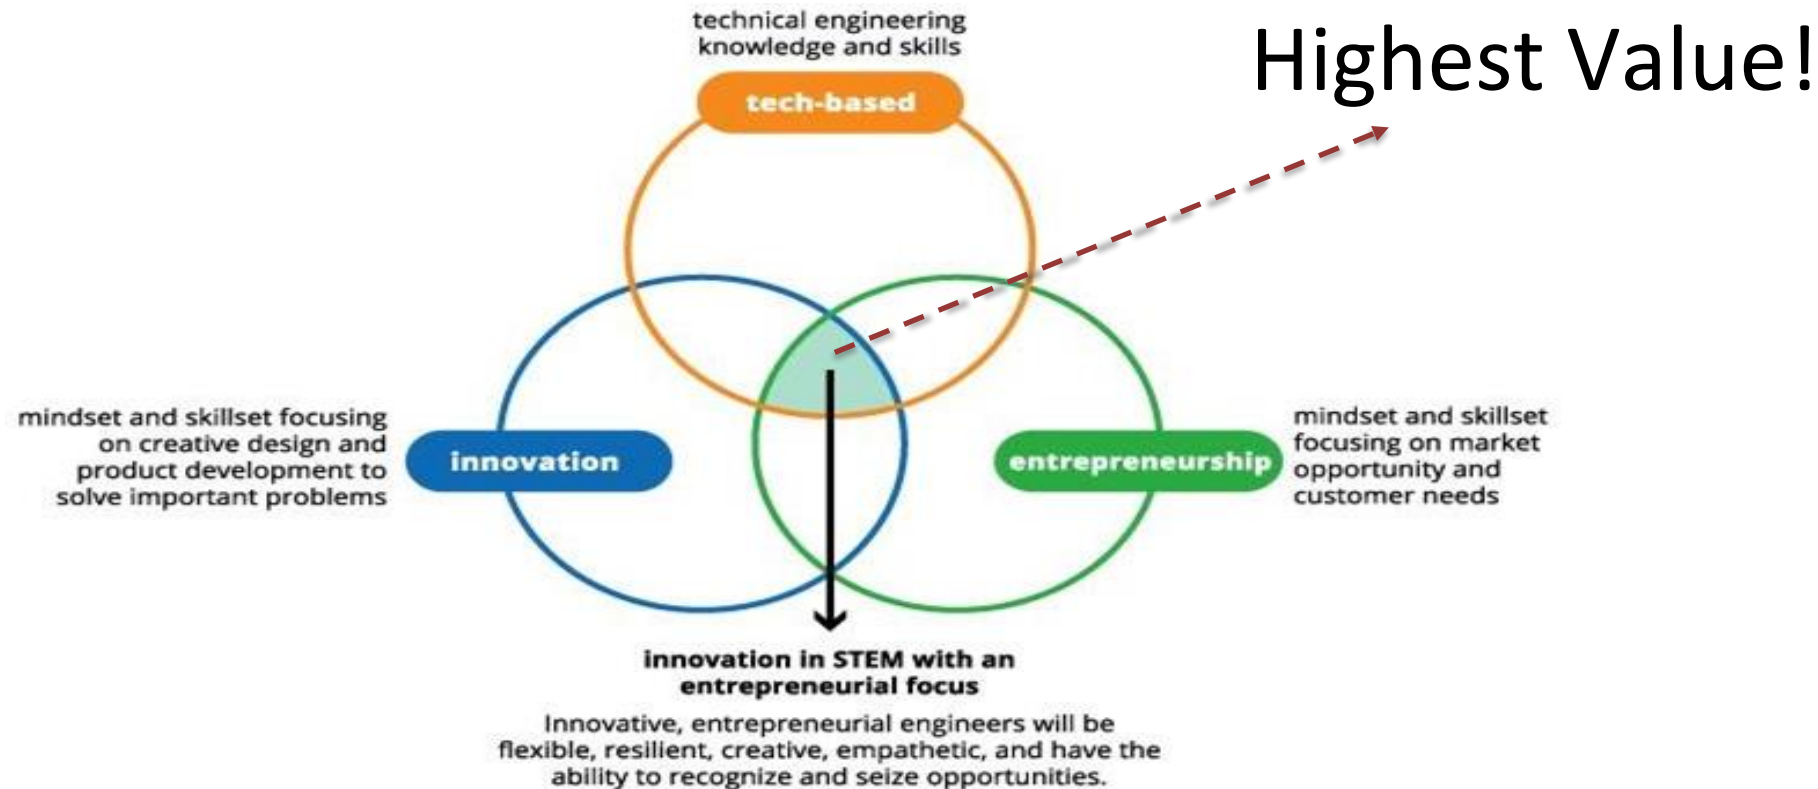

Stage: PROTOTYPE +

The start-up must have at least a prototype or MVP; Idea stage start-ups not considered

Target benefits from desi startup tech

TIMES NEWS NETWORK

Bengaluru: US retail giant Target has graduated its fifth batch of startups from its accelerator programme in India. The technologies that emerged from the batch of eight startups can be used for Target's ops

The four-month programme, which was launched in December 2013, helps Indian startups develop, scale and test their products in a live retail environ-

Technologies that emerged from the batch of eight startups can be used for Target's ops

ment while getting access from Target mentors in India and the US.

The graduated startups include Hyperworks, a technology that makes it easier for shoppers to use self-checkout with fresh produce, and Mooncraft Innovation Labs, an in-store digital shopping assistant powered by artificial intelligence. New technologies like AI,

machine learning, computer vision, analytics, and digital were some of the new technologies being used in this batch. "India has the third largest startup ecosystem in the world, and we've had the opportunity to work with some of the very best startups here," said Rakesh Mishra, vice president of marketing for Target and the accelerator programme's executive sponsor. "Every year we have seen an increase in the diversity of ideas and solutions of startups entering the program. We are thrilled by the success of the fifth cohort, and we look forward to

working with more startups through this programme," he said. So far, thirty startups have graduated from the programme and worked with Target teams across stores, marketing, finance, legal, merchandising, mobile and digital. IoT (Internet-of-things) is one of the new areas that the discount store retailer is looking at.

It opened Open House, a connected-device concept store in 2015 in the US. It gives consumers hands-on interactions with new IoT products and services. Target is looking for ideas from Indian startups for it.

Startup Lifecycle

FORMATION

Mission > Vision > Strategy

- Idea and co-founder team formation
- What, to whom, why and how?

VALIDATION

Lean Startup

Minimum Viable Product

Validate / Iterate (or pivot)

GROWTH

Scale Up

Establish & Strengthen

Processes & KPI's

Idea

Business

Levels of validation

Problem / Solution Fit

Vision / Founders Fit

Product / Market Fit

Business Model / Market Fit

Ideating

Entrepreneurial ambition and/or potential scalable product or service idea for a big enough target market. Initial idea on how it would create value. One person or a vague team; no confirmed commitment or no right balance of skills in the team structure yet.

Concepting

Defining mission and vision with initial strategy and key milestones for next few years on how to get there. Two or three entrepreneurial core co-founders with complementary skills and ownership plan. Maybe additional team members for specific roles also with ownership.

Committing

Committed, skills balanced co-founding team with shared vision, values and attitude. Able to develop the initial product or service version, with committed resources, or already have initial product or service in place. Co-founders shareholder agreement (SHA) signed, including milestones, with shareholders time & money commitments, for next three years with proper vesting terms.

Validating

Iterating and testing assumptions for validated solution to demonstrate initial user growth and/or revenue. Initial Key Performance Indicators (KPI's) identified. Can start to attract additional resources (money or work equity) via investments or loans for equity, interest or revenue share from future revenues.

Scaling

Focus on KPI based measurable growth in users, customers and revenues and/or market traction & market share in a big or fast growing target market. Can and want to grow fast. Consider or have attracted significant funding or would be able to do so if wanted. Hiring, improving quality and implementing processes

Establishing

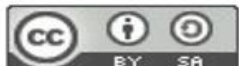

Achieved great growth, that can be expected to continue. Easily attract financial and people resources. Depending on vision, mission and commitments, will continue to grow and often tries to culturally continue "like a startup". Founders and/or investors make exit(s) or continue with the company.
